Harshita Vijendra Kumar
@harshita_vijendra_kumar

Profile Summary
Harshita is a professional with a strong background in software development and project management. She has worked for several years at various companies, including Google and Microsoft, where she has been responsible for leading teams and managing complex projects. She is currently a Senior Software Engineer at Amazon, where she is working on developing new products and improving existing ones. She is also a frequent speaker at conferences and has published several articles on her blog.

Education
Harshita has a Bachelor's degree in Computer Science from the University of California, Berkeley. She is currently pursuing a Master's degree in Software Engineering from Stanford University.

Skills
Harshita is proficient in Java, Python, and JavaScript. She is also experienced in using various frameworks and libraries, including Spring, Django, and React. She is a strong advocate for clean code and test-driven development.

Projects
Harshita has led several successful projects, including the development of a new product line for Amazon, the implementation of a new system for Google, and the optimization of a large-scale application for Microsoft. She is currently working on a project to develop a new platform for managing and analyzing large-scale data sets.

Blog
Harshita has a blog where she shares her thoughts on software development, project management, and career growth. She has published several articles on topics such as "How to become a Senior Software Engineer" and "The importance of clean code".
